

Cadet Quarters

Dear Papa,

I found out that we had to put our requisitions in before May that is tonight. So I hope (crossed out) have put mine in for the Engineer corps. I was influenced still more than be- you by the fad that I [?] 21 is steam this month, making 14th [?] and stood wooden in efficiency. Besides preferring this I feel sure that if I had taken the other course and anything went wrong I would always be saying if I had my own way it would have been different but when I have nice decided for my-self I do not think that- I will over grumble. I still think that men if I did not have a preference I would be doing the most sensible thing and do not think that I will even regret it. [?] that you are feeling better. I am

your most affectionate son,
Jamie

Friday night

P.S. you see that thing about Mallison [?] artfully sad wasn't it?
