Stenton 29th mo 5 1732

I recd^d thine of the 21st & have communicated it to y^e Govern^r who has made a proper use of it by Sam^l Chew just then setting out for Maryl^d when he recd^d it. I can say nothing farther on these heads than I have done, those people's conduct is unintelligible to us, for by the agreem^t fully concluded last 12th mo^o & then engraving, they have not the least pretence to these lands, but whether the Govern^r were executed or not we have not heard, tho' I believe Gov^r Ogle hopes they are not. We are now uneasy that we see not y^e Propriet^r after he has been so long expected. Gov^r White is this week gone down in a Pilot boat to bring him & Abr. Taylors up whom he is sure he says he shall meet at y^e Capes & I heartily wish it may ~~exp~~ prove so. One thing I must hint, that when thou inform'st of any thing of the same kind with the last or any way relating to the Public it will always be proper to address it to the Gov^r himself, because he can then ~~be~~ make use of it more properly than when he is to take his information from letters directed to another. The Bearer of this to town staying for it I am obliged to conclude wth G^o doe with kind love to thy self self. I B^s & his from

Thy affec^d friend

Lancaster History

Stenton 29th 5 mo 1732

My fr J D

I received thine of the 21st and have communicated it to ye Governor who has made a proper use of it by Samuel Chew just then setting out for Maryland when he received it. I can say nothing further on these heads than I have done, those people conduct it unintelligible to us, for by the agreement fully concluded last 12 month and then engrossing, they have not the least pretense to these lands, but whether the were executed or not we have not heard, tho I believe Governor Ogle hopes they are not. We are now uneasie that we see not ye Proprietor after he has been so long expected. John White is this week gone down in a Pilot boat to bring him and Abraham Taylor up whom he is sure he says he shall meet at ye capes and I heartily wish it may prove so. One thing I must hint, that when thou inform of any thing of the same kind with the last or any way relating to the public it will alwayes be proper to address it to the Governor himself, because he can then make use of it more properly than when he is to take his information from letters directed to another. The bearer of this to town staying for it I am obliged to conclude which I doe with kind love to thy self

Thy assured friend
